

Pinch Valve

A pinch valve is a filled bore or completely ported kind of control valve which uses a pinching effect to obstruct fluid flow. There is a little form of pinch valves based upon application. We are engaged with manufacturing, supplying, and exporting of pinch Valve, open Body Pinch Valve, Closed Body Pinch Valve, Industrial Pinch Valve, and [Pneumatic Pinch Valve India](#).

Advantages:

- Low & easy maintenance
- Low Weight
- No Clogging or dead spots
- Compact, simple, robust & straight through design
- Very fast opening/closing times
- Self Cleaning
- Permanent seal with tight shutoff
- Minimal turbulence & friction
- No mechanical parts, and no bearing, seals or packing required.

Disadvantages:

- Temperature range is limited.
- Medium operating pressure is limited.
- Face to face length may be an issue when limited space for fitting the valve is available.

Open Body Pinch Valve

We are foremost manufacturer of Open Body Pinch Valve. This valve is deliberate for non-hazardous media and lower pressure operation. This design isolates vibration and tolerates negligible misalignments of the cylinder. It is also light-weight and simple to service. Material operation includes fabricated carbon steel stainless steel. [Open body pinch valve manufacturer India](#) range starts from 1" to 6" in diameter.

Features:

- Durable
- Resistant to corrosion
- Easy Maintenance
- Available at very low cost
- Required very low maintenance
- Full port area prevents pressure drop
- Clearly visible valve position offers easy watch

Closed Body Pinch Valve

We are the established business involved in manufacturing, supplying and exporting a proficient collection of Closed Body Pinch Valves. These valves offer simple means to manually control the flow of rough and caustic slurries, liquid and solids. The whole entire ranges of [closed body pinch valves](#) are fabricated using high-grade raw material as per the quality standards.

These Valves control by turning the hand wheel clockwise to close, counterclockwise to open like a gate valve, but unlike a gate valve. These sequence valves have no packing or metal surface to wear out the sleeve is simply squeezed to the preferred open or closed position.

Industrial Pinch Valve

We have designed and developed the most competitive range of the [industrial pinch valves](#) to cater vast field of industries to cover up the dissimilar area of products. We offer appropriate range of pinch valves. We offer different sleeve material for the varied applications. We offer varied sleeve options for the sleeve materials like natural, neoprene, butyle, nytrile, hypelone, silicone and viton.
